Foit-Albert Associates is a full-service architecture, engineering and surveying firm that integrates quality design, functionality, and practicality so that the final product meets our clients' objectives and is an extension of its natural surroundings. Our design teams, working through four key offices, have won more than 20 local, state, and national design awards, which is a testament to the quality of work we provide to all of our clients.

The architectural group has designed diverse building types that include university facilities, hotels and resorts, historic preservation and adaptive re-use of existing buildings, courthouses, educational facilities, institutional facilities, sports and recreational facilities, museums, theatres, libraries and visitor's centers as well as multi-family and student housing projects. Our LEED™ accredited architectural and engineering staff is experienced in designing sustainable or "green" buildings.

The engineering group provides services for a variety of local, state, and federal government and private clients. Project types include bridges, highways, roads, intersections, parks, trails, multi-use paths, stormwater management, environmental engineering, water systems, sewer systems, parking lots, and planning board review projects.

The surveying group handles professional land surveying needs for commercial and residential clients. Our expertise ranges from boundary surveys, ALTA/ACSM Land Title Surveys, 1A and 2C survey and certification of wireless telecommunication facilities to topographic surveys for architectural and engineering support. Foit-Albert's survey field crews are equipped with current state-of-the-art equipment supported by CADD graphic workstations.

When you choose Foit-Albert Associates, you are making the conscious decision to combine quality, functionality and practicality in a partnership as we work towards your goals. With every project we deliver, we strive to provide an extraordinary design experience that will help better your environment, community, and organization.
